

# Fringed Cowl

From an idea/pattern by [Kriskrafter](#) [Stringy Cowl]. Hers is made using a garter carriage, I have used Knitweave.

**Standard gauge, tension 3.**

**Knitting yarn: fine, 2/30s – I used 1 ply superwash wool**

**Weaving yarn: textured fine e.g. 2 ply weight – I used boucle**

**[Or experiment!]**

**Punch card or stitch pattern. I used card 1.**

Cast on with waste yarn over stitches 30L/30R and knit a few rows to hang weights.

Change to main knitting yarn. Knit 2 rows, setting machine to read pattern on 2<sup>nd</sup> row

Use weaving brushes.

Knit using Knitweave function to weave in textured yarn. While doing this, you can create the fringe automatically in three ways, depending on whether you want both yarns in the fringe, or just one. Choose one of these:

1. As you weave in the yarn, wrap the weaving yarn round the machine brackets at each end. I did this, but used a peg on the bracket [as I had the ribber attached]. You will need to take the yarn off every 20 rows or so, as the knitting grows.
2. Put needles 50L and 50R into working position. As you work you will have a gap between your knitting and one stitch at this position. You can either
  - a. Bring the weaving yarn out to this stitch and work it in
  - b. Keep the weaving yarn on the main knitting only

When you have knitted 250 rows or so [I knitted 270, which hangs quite low] cancel the stitch pattern and hang the cast on edge on the needles to create your cowl, before cast off loosely.

Finish by cutting the loops, or cutting the spare stitch on the fringes.
